

**23 days and 3000 KM in NW Namibia**

A 23 day, 3,000 KM four wheel drive journey through NW Namibia on 4x4 roads and river beds. Known as Kaokoland which is home to the Himba Tribe is located in one of the wildest and least populated areas in Namibia. This was a non-guided group of eight old mountaineering friends from Canada, Austria and Germany. The highlight of the trip was a three day stop in the remote village Purros where we are planning several self-sustaining infrastructure projects. Such as school addition, electric solar power and low cost advance degree village education.
